ConnectLED Bluetooth Controls

Maintenance Saving Wireless Controls

ConnectLED is an easy-to-use application that communicates with Evluma lighting products via Bluetooth Low Energy (BLE).

Configure and control your lights to enhance energy and maintenance efficiency.

Licensing

ConnectLED is available with a Site license. Combine ENTERPRISE and BASIC user licenses under one customized Site license depending on your staff requirements.

Easily manage multiple users through one convenient Customer Admin Portal (CAP).

A limited PROMO license is available when purchasing an AreaMax, OmniMax or RoadMax mini-pilot program.

Download ConnectLED from the Apple App Store, or Google Play to your existing device to communicate with your Evluma lamp or luminaire.

ConnectLED connects to each luminaire individually. The luminaire will flash to confirm your initial connection. A sequence of flashes indicates successful programming.

ConnectLED & Photocontrol Failsafe™

Evluma's Photocontrol Failsafe operates independently of ConnectLED guaranteeing continuous dusk-to-dawn illumination regardless of photocontrol failure. Use ConnectLED to update lamp GPS location and monitor Photocontrol Failsafe status.
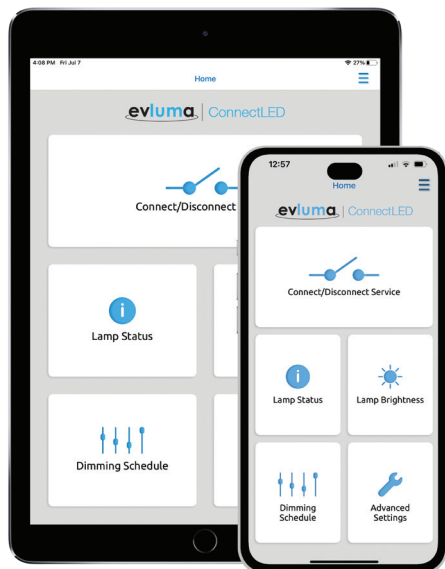

Compatibility
approved for but not limited to the following

Apple iOS:
Runs on iPhone 6s and later, iPad Air 2 and later, all iPad Pro models, iPad 5th generation and later, iPad mini 4 and later, iPod touch 7th generation. iOS 14 and later.
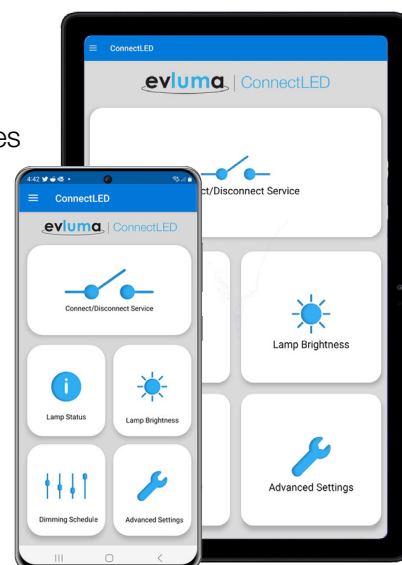

Android OS:
Runs on Android tablets and phones, OS 5.0 (Lollipop) or later.

Apple iPads & iPhone

Android Devices

Quick Function Features
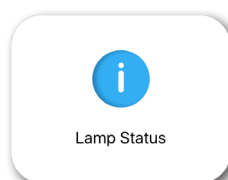

Accessible from the Home screen

Connect/Disconnect

Easily manage the use of electricity from the ground during the transfer or disconnection of service and save on maintenance. Perfect for areas that only require seasonal lighting. Operates up to 100' from lamp. Line of sight recommended.

Connect / Disconnect

Perform non-destructive disconnect for termination of service.

Lamp Status

Quickly review a summary of lamp settings, access event history and monitor Photocontrol Failsafe. Reads Faultcast™ maintenance status broadcasts from AreaMax or RoadMax during the day - the hardest time to troubleshoot a light!
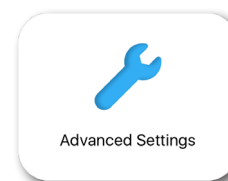

Lamp Status

Track settings or performance changes. Easy-to-read alarms.

Lamp Brightness

Need less light due to location (light trespass), or energy budget? Define brightness settings that also save energy. Perfect for light sensitive areas. Match IDA approved models with shields for the best Dark Sky Friendly results. Stock fewer SKUs knowing you can convert a higher wattage light to a lower wattage instantly.
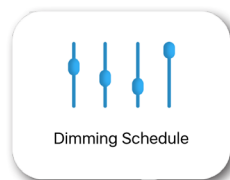

Lamp Brightness

Resolve light trespass complaints with the touch of a button.

Advanced Settings

Add clarity to asset management programs with customized lamp names, writable utility fields and GPS location details. Have a question? Easily share data via an Event Log with Evluma technical support.

Advanced Settings

Have a service question that you'd like ConnectLED to answer. Our team is ready to innovate. Contact us for customization.

Dimming

Get the right light for the right time. Maximize smart energy savings when setting custom dimming schedules for anytime between dusk and dawn. Three separate settings. Dim-to-Off programming available!

Dimming Schedule

Comply with changing lighting ordinances, efficiency targets or ecological impacts.

Controlling Street & Area Lights has never been easier

- Connect/Disconnect

- Adjust Brightness

- Dimming Schedule

- Dim-to-Off

- Daytime troubleshooting

- Event log

Dim park and street lighting to accentuate seasonal lighting and evening events.
